

ÖZEL ELEK / CUSTOM SCREEN / CRIBLE PERSONNALISÉ

24

ÖZEL ELEK

- Uzun ömürlü rulman
- Kolay bakım
- Geniş kat araları
- Yüksek kapasite
- Güvenilirlik
- Yüksek elek verimi

CUSTOM SCREEN

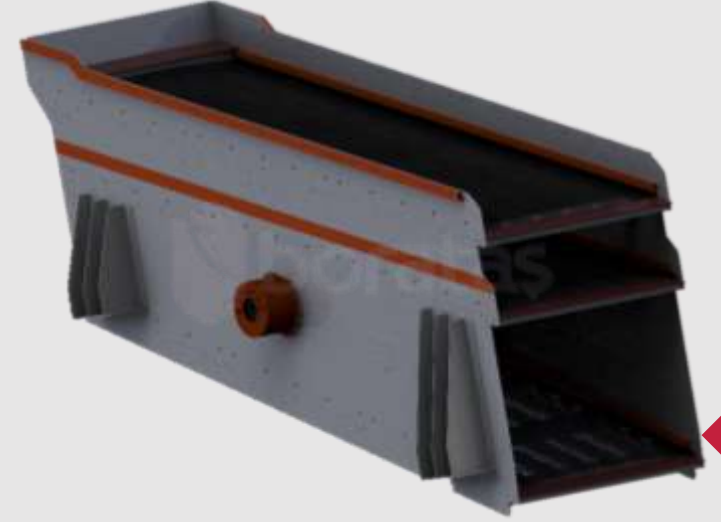

- Long life bearing
- Easy maintenance
- Wide floor space
- High capacity
- Reliability
- High screen yield

CRIBLE PERSONNALISE

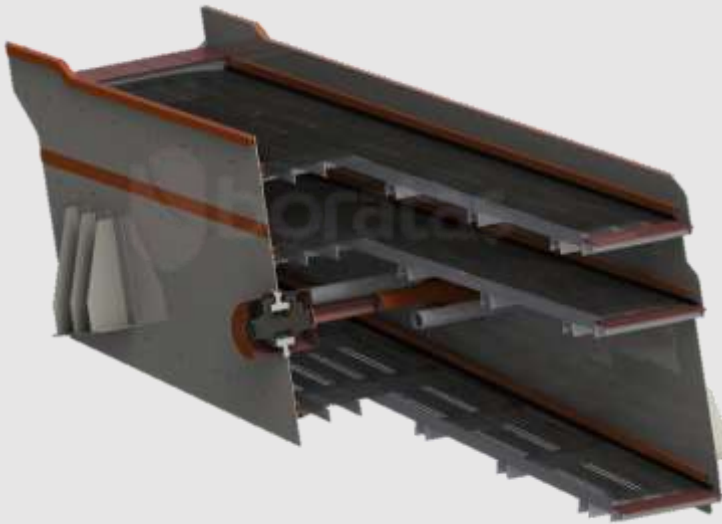

- Longue durée de vie
- Entretien facile
- Large espace au sol
- Haute capacité
- fiabilité
- Rendement élevé du crible

- Özel elekler kademeli eleklerde olduğu gibi ürün eleği olarak kullanılmaktadır. İnce malzemede eleme verimini arttırmak amacıyla alt kat ve üstkat eğimleri birbirinden farklıdır. Bu eleklerde de eleme kapasitesi standart titreşimli eleklerle göre %20-30 daha fazladır. Kademeli eleklerle göre avantajlı yönü müşteri tercihine göre 4 katlı olarakta yapılmasıdır.
- Custom screens are used as product screen similarly to the multiscope screen. In order to increase the screening efficiency of thin materials, the slopes of the bottom and the top deck are different from each other. Moreover, these screen's screening capacity is 20-30% more than the standard vibrating screens. The advantageous aspect compared to multiscope screens is that this custom screen is made as 4 decks according to customer preference.
- Les cribles customisés sont utilisés comme produit de crible étant similaire aux cribles à pente multiple. Pour augmenter l'efficacité du criblage des matériaux fins, les pentes de l'étage inférieur et celui du supérieur sont différentes l'un de l'autre. En outre, la capacité de criblage de ces cribles est de 20 à 30% supérieure à celle des cribles vibrants standards. L'avantage par rapport aux cribles à pente multiple est que ce crible customisé est constitué de 4 étages selon les préférences du client.
